MODEL MP 506

For lifting motors from cars, trucks, tractors and boats. Can be locked with long and short legs to hold a motor at proper angle for installation or removal. Capacity 2350 lbs. A bolt through the anchor lugs converts it to an excellent anchor loop for vertical lifting, horizontal pulling, stretching or positioning.

SKU NO. 700569

**2 TON HEAVY-DUTY, DOUBLE DRIVE**

Revolutionary design and engineering make this the most rugged, reliable and safe puller for today's industrial requirements. Ratchet wheels on both sides for a balanced drive. Double locking and driving pawls independently sprung to insure alignment with ratchet wheel teeth. Tubular steel cable guide guards against excessive wear or fraying. Two legs transfer load to cable drum, minimize distortion and binding locking and lifting pressure applied uniformly to both sides of cable drum.

**GRADE 70 TRANSPORT CHAIN**

Grade 70 is extremely strong for its light weight and is used primarily for load binding in the transportation industry. However, it is also used extensively on farms, in lumbering, towing and construction. Grade 70's high strength to weight ratio is achieved due to the boron manganese steel from which it is fabricated. It resists wear because of its exceptional hardness properties.  
**MATERIAL** — Boron Manganese steel.

**HALF DRUMS**

Grade 70 is approved by the Department of Transportation for truck tiedown use. Acco Grade 70 meets all applicable State requirements.
