

DRYWALL

One 5 gallon ready mix joint compound will be required for every thousand square feet of drywall.

Tapered edge allows space for tape and joint treatment to be applied so completed job will be flat.

TYPE	DESCRIPTION	SHEET	1/4"	3/8"	1/2"	5/8"
Regular Gypsum Board	Gypsum Board is faced with a cream paper which will accommodate virtually any decorative treatment. A gray paper is used on the backside of the board. The 1/2" and 5/8" thick tapered board is recommended for single layer application in new construction.	4' x 8'	14DW	38DW	12DW	
		4' x 10'			12DW10	
Fire Rated Gypsum Board	When used on both sides of a load-bearing wood stud partition, 5/8" Type X gypsum board has a 1-hour fire rating while 1/2" Type X will provide a 45-minute rating.	4' x 8'			12FRDW	58FRDW
		4' x 10'			12FRDW10	58FRDW10
		4' x 12'				58FRDW12
Water-Resistant Gypsum Board	This gypsum board product, identified by a green face paper, has a water-resistant core intended for use as a backing for ceramic, plastic or metal tile in tub, bathroom, or shower areas. "GREEN BOARD"	4' x 8'			12WRDW	58WRDW
Exterior Gypsum	FOR EXTERIOR USE FIRE-SHIELD JUMBO GYPSUM SHEATHING. To be used as sheathing for fire rated exterior wall construction, type X core. 5/8" ANSI C-79	4' x 8'				58EXDW

INTERIOR TILE BACKER BOARD

Durock Interior Tile Backer Board possesses excellent flexural and compressive strength, hardness and impact resistance as a tile base. The board surface provides high shear bond strength with latex fortified mortar and Type I water-resistant organic adhesives.

Durock Interior Tile Backer Board provides a smooth, sound base for glass and ceramic mosaics; ceramic and quarry tile; lugged tile; thin stone and brick. Suitable for application to wood or steel framing spaced 16" o.c. in new construction and in remodeling. Board is ideal for use in interior partitions, walls, floors, ceilings in wet or dry areas. It is highly efficient in high-moisture areas found in baths, showers, kitchens and laundry rooms.

For Drywall and Veneer Plaster Finishes

SHEETROCK Zinc Control Joint No. 093 is used to relieve stresses of expansion and contraction across the joint in large ceiling and wall areas in drywall and veneer finish systems. Used from floor to ceiling in long partition runs and from door header to ceiling. Also recommended for repair of existing plastered masonry. Made of roll-formed zinc to resist corrosion, has 3/32" grounds. Plastic tape protects 1/4" opening 7/16" deep, removed after installation. *Limitation:* where sound transmission and/or fire ratings are prime considerations, an adequate seal must be provided behind control joint.

NOVA CORK

Cork covered paneling

Bulletin Boards (Cork Board) Non Framed

PRODUCT DESCRIPTION

Nova Cork is a factory prefinished interior paneling composed of natural virgin cork laminated to both sides of Homasote fiberboard.

USES, APPLICATIONS

Nova Cork panels are prefinished, tackable, wall panels. They are used in homes, schools, offices, or any application where a decorative, tackable wall is required. Nova Cork panels are available in 4' x 8' and smaller cut to size dimensions (see chart below). The 4' x 8' panels carry a Class B Fire Rating and are also available in Class A. Cut to size panels are Class B Fire Rated only.

ADVANTAGES

Nova Cork panels have the versatility to be an attractive finished wall panel and provide a fully tackable surface that conceals tacks and pinholes.

GENERAL PURPOSE

Product Description

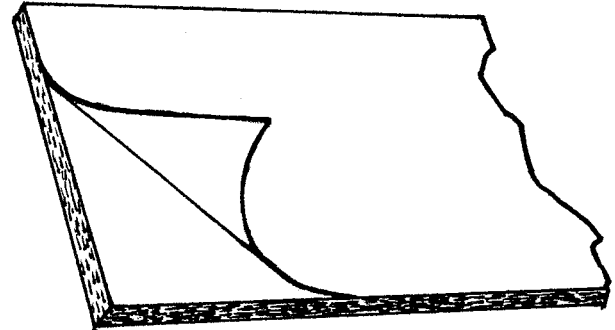

General Purpose laminates are manufactured by pressing core papers impregnated with phenolic resins, a decorative sheet, and an overlay sheet impregnated with melamine resins at 1200 psi at 325°. The back is sanded to provide uniform thickness and to facilitate bonding.

Basic Uses

General Purpose Grade laminates are designed for both horizontal and vertical applications and is suited to a wide variety of uses. These include counters, table tops, vanities, interior doors, cabinets, as well as retail store fixtures, contract furniture, reception areas and pedestals. Vertical grade is identical in manufacture except for its thickness, and is designed expressly for verticle applications such as wall panels, interior doors, bath enclosures, toilet partitions, elevator cab interiors and other vertical end uses.

Installation

Decorative laminates should be bonded to a suitable substrate, such as good quality plywood, medium to high density fiberboard particle board and metals. Use adhesives and techniques as recommended by the manufacturer, DLPA Spec. No. Q51-1008, and NEMA LD3.1-1991.

EDGE SQUEEZE ROLLER

This lever action roller puts pressure on the laminate at the edges to seal them down tight to the substrate. Very useful for correction the occasional edge-lift problem, and handy for pressing edge strips on tightly. The tip roller rides on the underside and the mid-roller rides on the upper-side to put handle pressure on the edge. Non-marking plastic rollers. 12" OAL. (SR-79).

SKU NO. 700008

No. J-200 JAY ROLLER

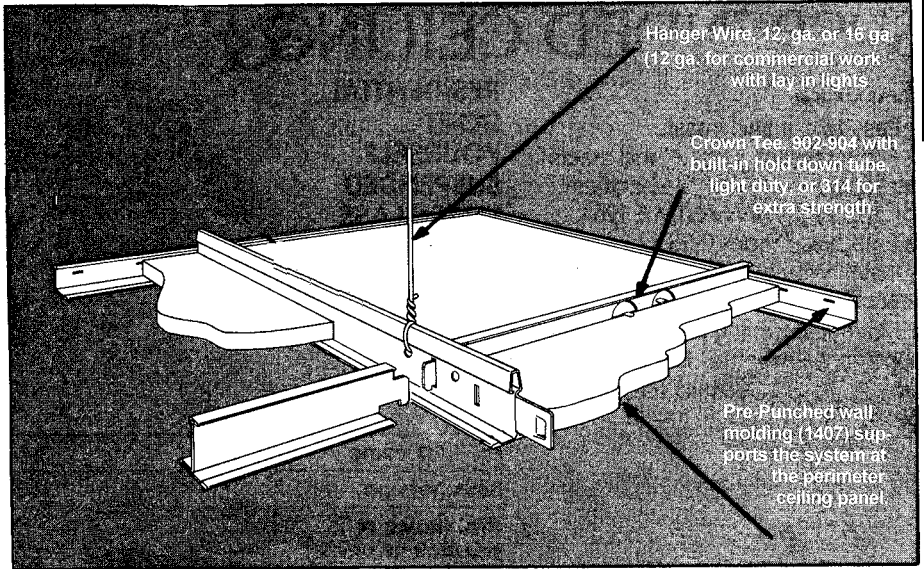

Designed specially for plastic laminate work. Gives 20-25 lbs. pressure per inch. 3" wide solid non-marking rubber roller has no axle projections on one side, permitting rolling flush to walls without marring them. This is a really important feature. Lightweight aluminum handle is 14" long. Recommended by a leading plastic laminate manufacturer.

SKU NO. 455343

 Chicago Metallic Corporation

300 SYSTEM

The 300 System is the convenient and economical way to lower high ceilings, or cover exposed joists, ductwork or damaged plaster, distinctively. Rooms become quieter, brighter and more elegant.

FIRE FRONT™ 240 SYSTEM

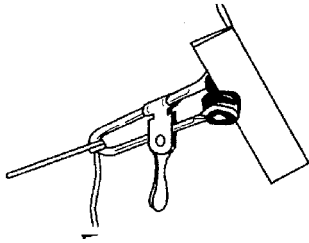

The Fire Front™ 240 System is America's number one fire-rated ceiling system

In a fire situation, the elongation of components (due to heat) is compensated for by built-in expansion sections which do not interfere with the system's assembly, performance or appearance. The components maintain their position, holding fire-rated acoustical panels in place, and thereby protect the building's structure.

CEILING TILE INSTALLATION KIT 802566

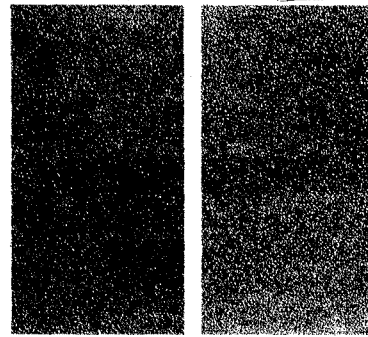

SUSPENDED CEILING PANELS

FEATURES

- Easy to cut and install.
- Fire-retardant; Class A and meets requirements of Federal Specifications SS-S-118B and ASTM E 1264. Flame Spread Index 0-25.
- Install with only 2" of overhead clearance.
- Fiberglass ceiling panels are vinyl-faced and washable. Just use a damp sponge and mild soap solution.

RESIDENTIAL/DO-IT-YOURSELF SUSPENDED FIBERGLASS PANELS

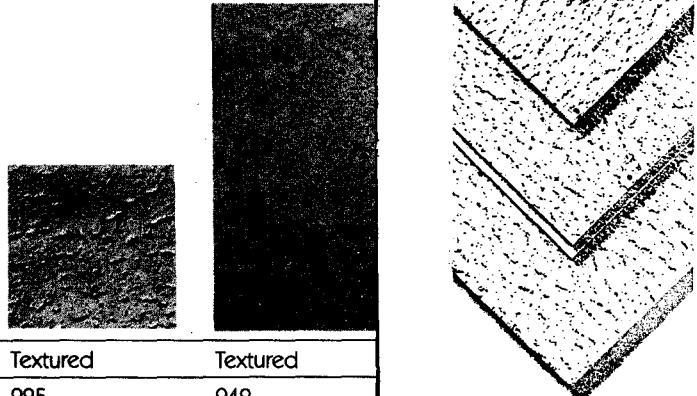

Product name	Esprit	Random Fissured
Item no.	403	2910
NRC (noise reduction coefficient range)	50%-60%	.70
Size	2'x4'x5/8"	2' x 4' x 5/8"
Sq. ft. per carton	80	128
SKU NOS.	101785	101812

FEATURES

- Washable with mild soap solution (except Rockcastle)
- Fire-retardant; Class A and meets requirements of Federal Specifications SS-S-118B and ASTM E 1264
- Require only 3" clearance (additional clearance may be required for fluorescent light fixtures.)
- Acoustical—absorb at least 45% of all the sound that strikes surfaces
- Can be painted with no noticeable loss of acoustical efficiency

FASHIONTONE SUSPENDED CEILINGS

Product name	Textured	Textured
Item no.	925	942
NRC (minimum noise-reduction coefficient)	55%	55%

Acoustical Products Company

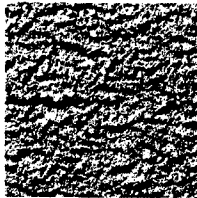

1/2' x 2' x 4' panel*
 square-cut edge (sq)
 • FIRECODE (2-mil White Vinyl)

Standard panels, with a FIRECODE "C" core and square-cut edges, come in 2' x 4' sizes, with a laminated white vinyl facing. The vinyl facing is a tough 2 mils thick and Stipple-pattern embossed for a soft, lightly-textured look. It resists soiling, and is easy to clean—two good reasons these panels have been USDA-accepted for food processing/service area. The unfinished-face panels provide a functional ceiling for applications where real bare-bones economy is the overriding criterion.

Easy Maintenance: embossed vinyl surface is washable to keep surface bright and light reflecting.

SKU NO.	Mfg. No.	Size
101810		2' x 4'

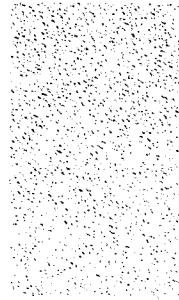

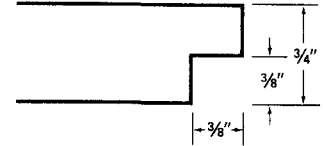

Acoustone

Heavily fissured, and rugged in feeling, Glacier pattern's deeply etched texture creates a natural ambiance. Overall roughness obscures joints in tile ceilings for the nearly monolithic tile look that suits any setting.

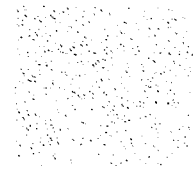

SKU NO.	Mfg. No.	Size	Color
101821	707-1	2' x 2'	White Glacia

Auratone

Omni Fissured AURATONE Mineral Acoustical Panels and Tile are made up of mineral-wool fibers water-felted into units with excellent balance of sound absorption and sound attenuation. Omni Fissured, the only AURATONE Tile pattern available in color, is a versatile, nondirectional pattern of pin perforations and irregularly shaped fissures intermixed. It blends smoothly and unobtrusively with almost any decor.

Single Door

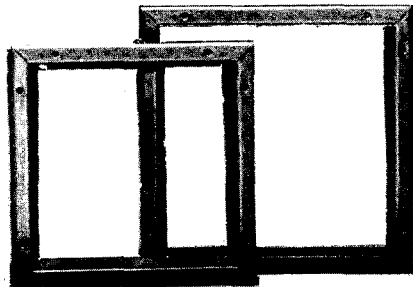

Stock doors are fabricated from cold rolled 18 ga. steel. 16ga. or 20ga. doors can be ordered as well as galvanized.

LABEL CLASSIFICATIONS

LABEL CLASSIFICATION	LOCATION IN BUILDING	MAXIMUM GLASS AREA
A 3 HOUR RATING	Class "A" openings are in walls separating buildings or dividing a single building into fire areas. Doors for these openings require a fire protection rating of 3 hours and no glass is permitted.	NONE ALLOWED
B 1 1/2 HOUR RATING	Class "B" openings are in enclosures of vertical communication through buildings. These could be stairwells or elevator shafts. Doors therefore require a fire protection rating of 1 1/2 hours.	100 square inches per leaf
C 3/4 Hr. RATING	Class "C" openings are in corridors and room partitions. Doors for these areas require a fire protection rating of 3/4-hour, and the glass area cannot exceed 1296 square inches per light with no dimension exceeding 54 inches.	1296 sq. in. No dimension to exceed 54"

VISION-LITES

MODELS 84G AND T4G GLASS FRAMES

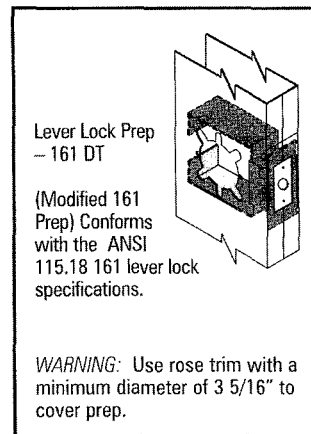

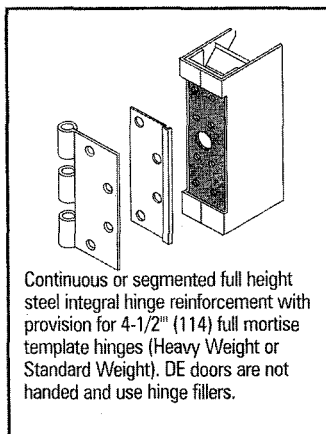

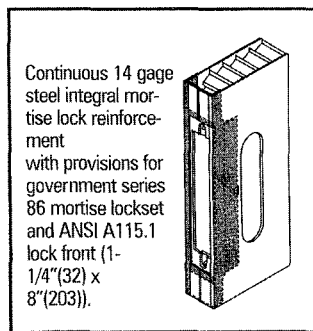

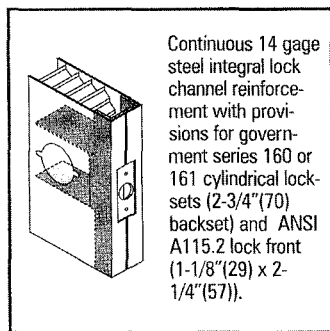

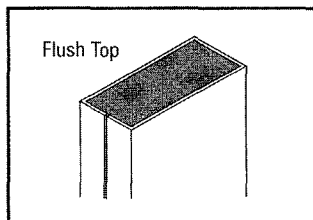

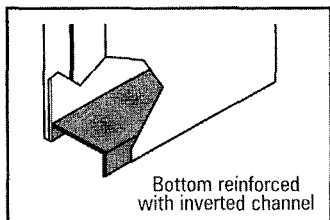

UNDERWRITERS' LABORATORIES

Frame structures are listed when installed in classified Fire Doors, using approved installation methods.
 No need for precise cut-outs. Works to

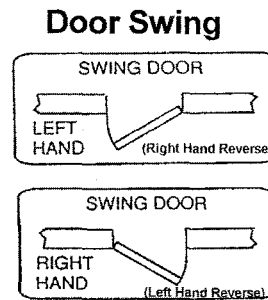

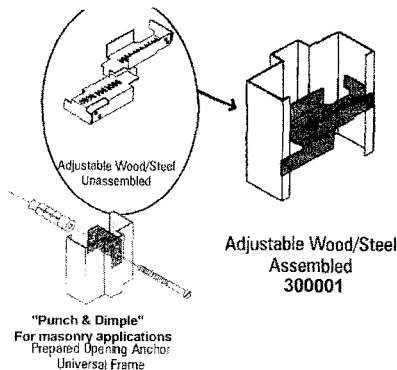

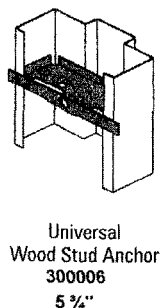

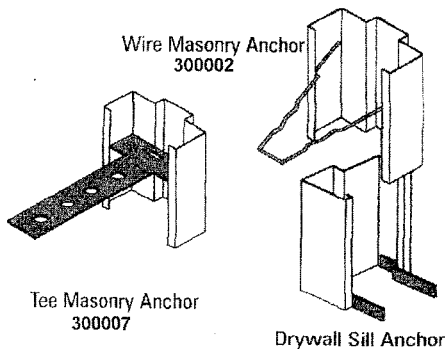

a rough opening – just as with door louvers. Tight to door surface – with direct screw attachment. For hollow core wood and plastic door use plastic screw anchors or Molly fasteners. Listed applications require special fasteners. Use Kit 115127 for Wood Doors.

VINYL COVE BASE

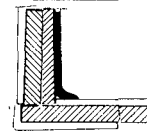

".080"

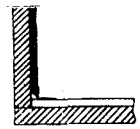

RIBBED AND KNURLED BACK
For good adhesion.

OUTSIDE CORNERS AVAILABLE.

SET-ON BASE
For use with hard surface floors.

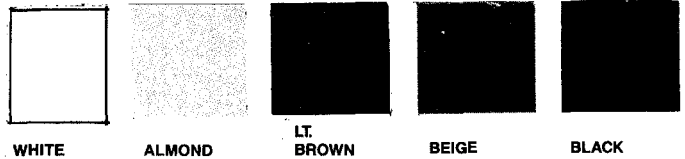

STRAIGHT BASE
For use with carpets.

Made of homogeneous vinyl in a complete range of contemporary colors. Nafco Vinyl Cove Base has a superior finish to assure an attractive juncture of floors and walls. Its flexibility not only makes installation fast and economical, but it helps conceal floor and wall irregularities.

Flexco Adhesives must be used with this.

GAUGE: 1/8" and .080" LENGTHS: 48" lengths and 120' rolls.
 Available in 2 1/2", 4" & 6" heights; set-on & straight.

HOUSE WRAP & FOIL INSULATIONS

TYPE	SKU NO.	PART NO.	R-VALUE	WIDTH	LENGTH	SQ. FT/ROLL
REFLECTIX INSULATION Reflectix is a 5/16-inch thick reflective insulation which comes in rolls and is made up of seven layers. Two outer layers of aluminum foil reflect most of the heat which heats them. Each layer of foil is bonded to a layer of tough polyethylene for strength. Two inner layers of bubblepack resist heat flow, while a center layer of polyethylene gives Reflectix additional strength.	102487	FT210	Foil Seal tape	2"	30'	5'

AMSTONE®

roof coating

Fibred Roof Coating is a heavy duty fibrated roof coating of brush consistency. It is used to rejuvenate worn built-up, metal, composition, or concrete roofs through resaturation and coating. It protects the underlying roofing felts from becoming brittle and cracking.

SKU NO.	MFG. NO.	SIZE
102595	595	GALLON
102600	546	5 GALLON

Wet Surface Roof Cement

Wet Surface Roof Cement is an all weather asphalt plastic cement that has been chemically fortified so that it will "wet out" and bond to water covered or damp surfaces, as well as dry surfaces. It can be used to patch splits and cracks less than 1/4" wide in gravel, mineral surfaced cap sheets and smooth surface asphalt roofs. It can also be used for the repair of flashings around chimneys, vent pipes and gravel guards, or cracks in concrete.

SKU NO.	MFG. NO.	SIZE

102805	548	5 GALLON

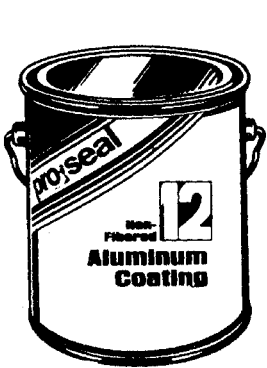

AMSTONE

LAP CEMENT/BLIND NAIL FIBRATED

A semi-mastic liquid adhesive for applying saturated felt and roll roofing materials. Quick-setting, cold applied for applications where hot-mopped installations are not practical. May also be used for blind nailing to eliminate potential nail hole leaks.

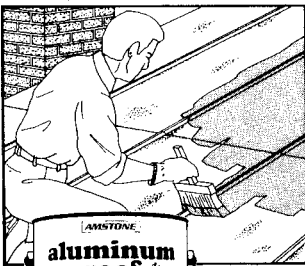

SKU NO.	MFG. NO.	SIZE
102583	0557	1-Gallon

Non-Fibred Aluminum Coating

Pro-Seal #12 Aluminum Roof Coating is a quality, reflective, non-fibred coating with a myriad of brilliant aluminum flakes suspended in a tough and flexible vehicle of selected asphalt and solvent. Upon application, the bright aluminum flakes leaf to the surface to form a radiant metal shield. Beautifies and reflectively insulates against the sun's destructive rays and protects against winter moisture. It may be applied by spray, brush or roller.

GAF - 25 year

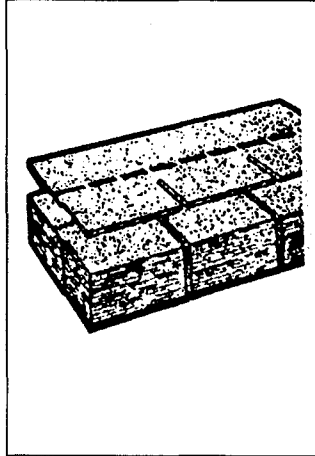

Classic is a high performance glass fiber shingle that catches the eye of today's quality and value conscious customer.

Because *Classic* shingles incorporate a glass fiber "base mat," they resist blistering, curling, buckling and they won't absorb moisture. And because they contain more weathering-grade asphalt than comparable organic shingles, they provide superior protection against harsh weather.

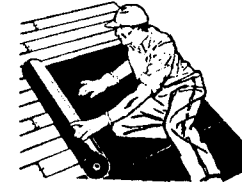

Classic shingles carry Underwriters Laboratories Class A Fire Rating as well as the U.L. Wind Resistance Rating.

Product Description

- 12" wide x 36" long
- Three tabs per shingle
- Three bundles (80 shingles) per square

COLOR	SKU
White	102503
Black	102505

Mineral Surfaced Roll Roofing

This glass fiber based roll roofing incorporates modern technology in a popular roofing product. The strong glass fiber mat assures that it won't absorb moisture. This makes it lay flatter, last longer and resist weather better. Owens-Corning Fiberglas mineral surfaced roll roofing comes in two popular colors. It's attractive. It's economical. It's the really durable solution for the low sloped roof.

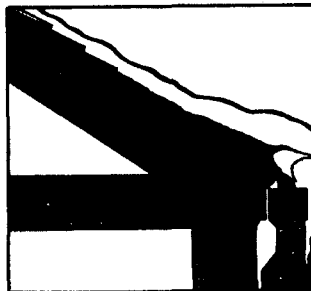

COLOR	SKU
White	102515
Black	102510

Ice & Water Shield™

Product Description

The Ice & Water Shield System consists of a primer and a membrane. They are economical and cold-applied with no special equipment necessary. Ice & Water Shield Membrane is composed of two waterproofing materials—rubberized asphalt and polyethylene. The rubberized asphalt surface is backed with a release paper that maintains the adhesive quality of the rubberized asphalt. During application the release paper is removed allowing the rubberized asphalt to bond tightly to the primed roof deck. Ice & Water Shield Membrane is supplied in rolls 36" wide and 75' long. It is self-adhesive and can be applied in temperatures down to 40°F.

SKU - 102562

Ice & Water Shield waterproofs the roof deck preventing melted snow from leaking into structure. The interior and its contents are protected.

19" Selvege Mineral Surfaced Roll Roofing for use on roofs with minimum slope of 1" in 12"

Specifications

- 36" wide by 36' long
- 108 square feet per roll
- Covers ½ square per roll

**BRIXMENT
Masonry Cement
Type N**

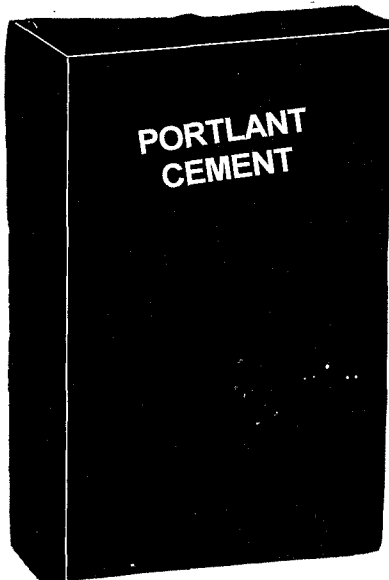

Masonry cement is a factory-prepared combination of materials so that, when mixed with water and the proper amount of well-graded sand, the mortar has a good balance of desirable properties.

- sand carrying capacity
- high degree of workability
- adequate strength
- low volume change
- intimate bond
- reduced efflorescence
- resistance to freeze-thaw cycles

A bag of BRIXMENT Type N when mixed with 3 cubic feet of well-graded sand produces a mortar that is recommended for all general masonry work—veneer, curtain and partition walls, chimneys and backup construction.

SKU NO.	Color
300010	Gray
300012	White

**Smith's Mortar
Colors Stocked
As Concentrates
Color Charts
Are Available**

Portland Cements

A bag of Portland Cement type I or III when mixed with 3 cubic feet of stone and 2 cubic feet of coarse sand will produce concrete that is suitable for general purpose slab construction.

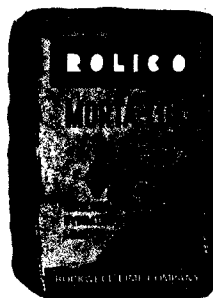

Type I is a general purpose portland cement suitable for all uses where the special properties of other types are not required.

SKU NO.	Color
300000	Gray
300005	White

Type III is a high-early strength portland cement that provides high strengths at an early period.

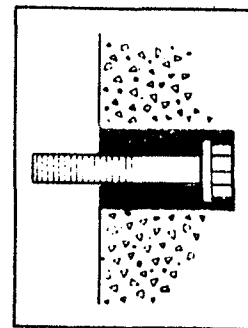

SKU NO.	Color
300008	Gray

MORTA-LOK LIME

There is a great flexibility in specifying mixture of type S hydrated lime and portland cement for mortar, gives a good bond, and elasticity under structural stress.

SKU NO.	SIZE
300015	50LB.

**POR-ROK®
Anchoring Cement**

Product Presentation

Por-Rok Anchoring Cement is a non-shrink hydraulic controlled expansion cement in a ready to use preparation. Water is added at the job site to create a pourable, yet durable, anchoring, patching or gouting compound.

POR-ROK sets in 15-20 minutes. Attains 5,090 psi compression strength after 60 minutes.

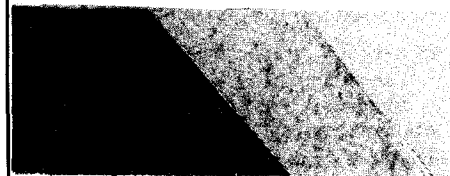

Pourable

When mixed according to directions, **POR-ROK** becomes pourable and will seep into pores and crevices.

SKU NO.	Size
301661	1 lb.
301662	5 lb.
301666	10 lb.
301667	25 lb.
301668	50 lb.

Blasting Sand

All sands are cleaned and there are no chunks to clog your nozzles.

SKU NO.	MFG. NO.	TYPE	SIZE
300020	2.4	Silica Sand	100LB.
301020	1240	Black Beauty	100LB.
301025	.45.55MM	Pool Filter	50LB.

Plasters

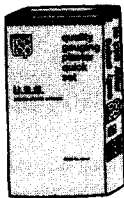

STRUCTO-LITE Gypsum Plaster contains mill-mixed perlite aggregate, and requires only addition of water at jobsite. Weighs less than half as much as sanded basecoats and provides greater insulation value with a "K" factor of 1.74.

SKU NO. 300050

Red Top Wood Fiber Plaster develops higher strengths than other conventional gypsum plasters. Recommended as scratch coat over metal lath. For machine application or use over masonry bases or other applications, add 1 cu. ft. sand per 100 lb. plaster. In 50-lb. bags.

SKU NO. 300055

Red Top Gauging Plaster is usually darker in color than CHAMPION and STAR gauging. Blends easily with lime putty for durable, smooth-trowel or sand-float finishes in residential construction. Offers high strength, hardness and abrasion resistance. Easily decorated. Apply over gypsum basecoat.

Quick Set, 30-40 min.; **Slow Set**, 50-70 min. Meets ASTM C28. In 100-lb. bags.

SKU NO.	TYPE
300065	Quick-Set
300060	Slo-Set

Ivory and Snowdrift Finish Limes are fine, white, double-hydrate products for superior finishing over basecoat plasters. Blend with gauging plasters and water into a smooth-troweling, highly workable finish. Autoclaved hydration (over 92%) speeds mixing and virtually eliminates surface defects caused by delayed hydration. Meets ASTM C206, Type S. In 50-lb. bags.

SKU NO. 300045

Plaster Of Paris

■ For carts, molds and for many shapes.

301250	53025	25 LB.

DIAMOND Interior Finish Plaster gives a strong, hard surface for commercial or residential construction. Hand-applied ¼" thick over IMPERIAL Base or over a bonding agent on monolithic concrete. Also suitable in a two-coat system over IMPERIAL Basecoat or a sanded gypsum basecoat. High coverage, fast application provides cost savings where the extra hardness of IMPERIAL Plaster is not required. White; can be left undecorated for float finishing or skip troweling. However, decorating should be specified and may be eliminated if finished plaster is acceptable. Unaggregated for smooth or skip-trowel finish; may be job-aggregated for float or other texture. In 50-lb. bags.

SKU NO. 300071

USG Moulding Plaster is used for specialized work such as ornamental trim or cornices. The plaster grain is very fine, ideal for sharp detail when used neat for cast work. Controlled set provides uniform workability. For running cornice work, add a small amount of lime putty to add plasticity and act as lubricant for the template. Provides approx. 1.5 cu. ft. per 100 lbs. Complies with ASTM C28. In 50-lb. bags

SKU NO. 300068

Red Top Retarder and Red Top Accelerator are available for use with plaster when required by job or climate conditions. When used in excess, setting and drying problems can arise. Use of too much retarder can weaken plaster finish. In 1½-lb. package

SKU NO.	TYPE
300074	Accelerator
300076	Retarded

WE ARE PLEASED TO SPECIAL ORDER ITEMS THAT ARE NOT ALREADY IN OUR INVENTORY

1

BLACKTOP 'N BOND® ASPHALT REPAIR MIX

A pre-blended, semi-flexible patching material for thin section repairs to asphalt surfaces. Made with finely graded aggregate, portland cement and specialty polymers, it may be applied in thicknesses from one inch down to a feather edge. Cures to the color of blacktop. Just add water.

SKU NO.	MFG. NO.	SIZE
301635	0685	40 lb. Pail
301636	0686	10 lb. tub

SAKRETE® BLACKTOP MIX & PREMIUM MIX

A blend of steam cured asphalt and graded aggregates. Can be used to build or repair any blacktop area. Simply place right as it comes from the bag in 1" layers and tamp firmly. Specifically designed for pothole applications.

SKU NO.	MFG. NO.	SIZE
301695	0071	60 lb. bag
301768	Premium	25lb pail

POUR 'N FILL™ CRACK FILLER

Seals cracks in concrete and blacktop. Moisture seeping through cracks can freeze and thaw causing even greater deterioration. Prevent it with POUR 'N FILL. For cracks up to 1/2" wide.

SKU NO.	MFG. NO.	SIZE
102639	0104	1 Gal.

SMOOTH 'R FILL® MASTIC PATCH

Heavy duty mastic filler for blacktop repair. Fills dips, scuffs and cracks. Resists gasoline and oil. Apply with trowel from 1/8 to 1/4 inch thick. Dries to a jet black color.

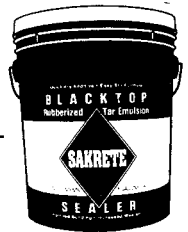

SKU NO.	MFG. NO.	SIZE
102641	0174	1 Gal.

SAKRETE® TAR SEALER

A tar pitch emulsion sealer with an easy stir formula designed to beautify blacktop surfaces while protecting the area from gasoline and oil drippings. Gives a jet black coating with a quick-dry additive. Resists weather and wear.

SKU NO.	MFG. NO.	SIZE
102630	0094	5 Gal.

SAKRETE® GILSONITE ASPHALT SEALER

An asphalt base product, which cures to a hard weather resistant, protective finish. SAKRETE® Asphalt Sealer improves the appearance of older paved areas and retards the natural aging process of blacktop pavements. Recommended for sealing blacktop driveways, parking areas, walks and other blacktop surfaces.

SKU NO.	MFG. NO.	SIZE
102625	0096	5 Gal.

DRIVEWAY CLEANER

Ready to use from the can, DRIVEWAY CLEANER is an ideal and effective method of removing dirt, grease, oil and gasoline stains and prepares driveways for the application of driveway sealer.

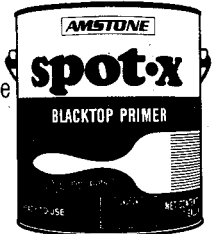

SKU NO.	MFG. NO.	SIZE
102631	0175	1 Qt.

SPOT-X-BLACK TOP PRIMER

For priming of grease, oil and gasoline spots, stains, and discolorations. Prevents oil and grease spots from "bleeding" through fresh blacktop sealer.

SKU NO.	MFG. NO.	SIZE
102628	0087	1 Gal.
102633	0433	1 Qt.

E-Z Stir Filler Sealer

Pro-Seal E-Z Stir Filler Sealer is a driveway reconditioner fortified with latex. Containing skid resistant particles, it fills cracks up to 1/8" wide. The combination of carefully selected ingredients and new processing methods allows the skid resistant particles to remain in suspension while maintaining ease of application. It will mix thoroughly and completely with minimal effort. E-Z Stir coats and protects blacktop and asphalt pavements only.

SKU NO.	MFG. NO.	SIZE
102635	23-1G	Gallon Can
102640	23-5G	5-Gallon
102636	23-1G	Squeeze Bottle Gal

CONCRETE SEALER

Ideal for application to basements; utility rooms, garages, mud rooms. Seals the surface of concrete to retard spreading of concrete dust to other areas. Also protects surface from water and oil stains.

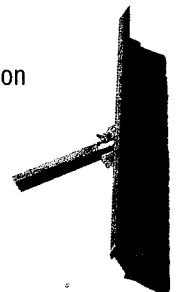

SKU NO.	MFG. NO.	SIZE
102629	0172	GAL

18" METAL/WOOD SQUEEGEE

Professional quality squeegees for the application of driveway sealer material.

SKU NO.	MFG. NO.	SIZE
890345	1800A	18"

SAKRETE® CONCRETE MIX

A mixture of Portland cement, washed and graded sand and gravel. For repair and building jobs where concrete thickness exceeds 2". Ideal for pouring footings, for anchoring poles and posts; for building walks, drives, curbs and steps. Exceeds ASTM specification C 387.

SKU NO.	MFG. NO.	SIZE
301655	0026	80 lb. bag
301660	0021	40 lb. bag

SAKRETE® HIGH EARLY STRENGTH CONCRETE MIX

A mixture of Portland cement, washed and graded sand and gravel, and special additives. Especially designed for fast setting of posts and poles. Pre-blended, no tools required. Use direct from bag. Ideal for fast, high strength repairs of existing concrete surfaces. Hardens fast for same-day use. Exceeds ASTM specification C 387.

SKU NO.	MFG. NO.	SIZE
301633	0545	60 lb. bag

SAKRETE® MORTAR MIX

A mixture of masonry mortar cement and graded bank sand. Especially designed for laying brick, block and stone. Can be used to repair masonry or used as a stucco. Exceeds ASTM specification C 387.

SKU NO.	MFG. NO.	SIZE
301680	0039	80 lb. bag
301685	0035	40 lb. bag

WHITE MORTAR

A mixture of sand, white Portland Cement, and lime. Ideal for laying glass block. Can also be used for laying brick, concrete block or field stone when a white grout seam is desirable.

SKU NO.	MFG. NO.	SIZE
301693	0601	20 lb. bag

SAKRETE® SAND MIX

An accurate blend of Portland cement and washed sand. Designed for repair and building jobs of less than 2" in thickness. Can be used for patching steps, sidewalls and floors. Can be used as a topping over existing concrete, as a grout for drain tile, as a stucco and as a bedding mix for laying flagstone or slate. Exceeds ASTM specification C 387.

SKU NO.	MFG. NO.	SIZE
301665	0033	80 lb. bag
301670	0029	40 lb. bag

PLUG-TITE® HYDRAULIC CEMENT

Actually stops leaks instantly even when water is still flowing. Sets faster than similar products. Expands to lock in tight. Works under water for swimming pool repairs.

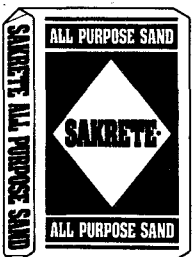

SKU NO.	MFG. NO.	SIZE
301705	0159	50 lb. pail
301710	0478	9 lb. tub

TOP 'N BOND® SELF-BONDING CONCRETE RESURFACER

Resurface broken or chipped concrete with a bright, new finish. Just trowel on TOP 'N BOND® Self-Bonding Cement Mix. Easy-to-use; just add water. Bonds stronger than regular cement mixes

SKU NO.	MFG. NO.	SIZE
301640	0144	40 lb. bag
301645	0143	10 lb. tub

SAKRETE® ALL-PURPOSE SAND

A uniformly graded and sterilized sand. Perfect for use as a soil conditioner, traction material on icy walks, as an absorbent in greasy areas and in pet boxes.

SKU NO.	MFG. NO.	SIZE
301700	0138	60 lb. bag

TUBE BAG GENERAL PURPOSE SAND IN PORTABLE BAG

SKU NO.	MFG. NO.	SIZE
301765		70 LB

SWIFT-SET® SAND MIX

Quick setting! No need to wait days before using patched areas. Non-shrinking; dries to a cement gray color. It even can be used in freezing temperatures. Walk on it in 30 minutes time.

SKU NO.	MFG. NO.	SIZE
301650	0163	40 lb. bag
301651	0164	10 lb. tub

CONCRETE BONDER

For increased strength between new and existing concrete, mortar or plaster. Just brush it on. Increases bond 8 to 10 times. Also for use as a "bond coat" or "admix". Ideal for use with Sakrete Sand Mix or Sakrete Concrete Mix.

SKU NO.	MFG. NO.	SIZE
301720	0150	1 Gal.
301725	0149	1 Qt.

GRAY CRACK FILLER

Fills and seals cracks up to 1/2" wide and 1" deep in concrete. Remains flexible and cures to the color and texture of concrete. Protects from water penetration. Cures completely in 12 to 24 hours of normal temperature and humidity.

SKU NO.	MFG. NO.	SIZE
102644	0683	1 Gal.
102643	0684	1 Qt.

**WATER PROOFING
CONCRETE BLOCKS
BRICK & STONE**

THOROSEAL®

Thoroseal is a cement-base, aggregate type, heavy-duty, waterproof coating for concrete and masonry. The aggregates are graded and sized so as to mesh perfectly; are selected for purity, hardness, and structural strength and are non-metallic. When they are combined with other ingredients a free flowing, waterproof coating is produced that possesses high strength, great durability and density.

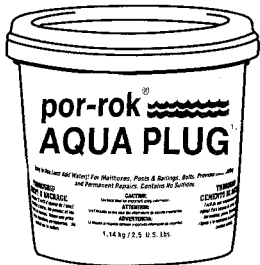

Uses

Waterproofing concrete, block, brick, stone and other masonry; interior and exterior, above or below grade. Waterproofing stucco and cement plaster. Waterproofing water reservoirs, tunnels, swimming pools, cisterns, basements and cellars. Waterproof back plastering for limestone panels. Also recommended as a base coat for Super Quickseal, Thorosheen and Thorocoat. Waterproof and finish concrete, eliminating the need for rubbing.

AQUA PLUG

Water Stop Hydraulic Cement

SKU	Mfg. No	Size
301671	49110000	10lb Pail

A durable water resistant hydraulic cement which sets in 3 to 5 minutes. Designed to stop leaks or running water, patch cracks and fill holes in masonry surfaces. Excellent for filling areas where floor and wall meet, or around pipes extending through masonry walls. May be used on interior or exterior surfaces.

**HYDRAULIC CEMENT
WATERPROOF**

WATERPLUG®

A cement-base, quick-set, hydraulic compound which instantly stops running water or seepage through concrete or masonry walls and floors. It actually becomes harder and more resistant when it is subjected to constant water pressure. Packaged in dry powder form, Waterplug requires only the addition of clean water to make ready for use. Waterplug contains no metallics, will not shrink or oxidize, and seals out water for the life of the structure. Waterplug sets in three to five minutes, depending upon the temperature of the mixing water and the surface into which it is applied. Low temperatures will retard the set; high temperatures will accelerate the set.

Uses

Stops running water or seeping through cracks and holes in concrete or masonry walls of basements, elevator pits, wells, mines, tunnels, cofferdams, sewers, cisterns, tanks; seals crack at junction of floor and wall; seals construction faults in concrete and holes left by tie wires, wood or steel separators. Grouts and seals around pipe, anchor bolts, conduits, etc.

**INTERIOR FLOOR
CEMENT**

**THORO®
UNDERLAYMENTS
SELF-LEVELING
AND TROWEL GRADE**

Thoro Underlayment is a cement based product designed specifically to level interior floors prior to applying floor surfacings. It is available in two grades, Self-Leveling and Trowel Grade.

Uses

Use Thoro Underlayment to level surfaces in new construction, remodeling work and corrective work. It is used as a subfloor finish for carpet, tiles, epoxy coatings and other floor-surfacing systems. It can be applied over concrete, wood, steel, ceramic tile and other sound, rigid flooring. It is compatible with common adhesives.

SKU NO.	MFG. NO.	SIZE
300337	2705	40 lb
300340	2700	55 lb
300342	Underlayment Primer #800	Gallon

**BONDING
AGENT**

ACRYL 60®

Acryl 60 is a special formulation of acrylic polymers and modifiers, available in liquid form for use as an additive with portland cement mixes to improve adhesion and mechanical properties. Cement mixes prepared with Acryl 60 are suitable for exterior or interior use; are hard, tough and fast curing; and possess good resistance to most common chemicals. Modified mixes are not affected by exposure to water. Provides positive adhesion over questionable surfaces.

Uses

To add extra bonding qualities when application is to be made over dense concrete or masonry. With Thoroseal and Thoroseal Plaster Mix. With pointing mortars, such as Dryjoint, to improve adhesion and curing. With cement

**MULTIGROUT
NON-SHRINK MULTI-FLOW
CEMENTITIOUS GROUT**

SKU	Size
301885	50 lb bag

MULTIGROUT is a non-shrink, cementitious grout that utilizes a unique expansion mechanism molecular composition. This composition allows the product to be ideal for a variety of applications/methods including: Packed, Rodded, vibrated, poured or pumped. Thoro MULTIGROUT meets or exceeds Corps of Engineers specifications CRD-C-621 and ASTM C-1107-91a.

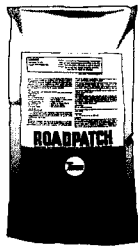

ADVANTAGES & TYPICAL USES

Can be used in/to grout machinery bases, structural columns, pump and equipment bases, bearing plates, rail posts, dowel/rebar replacement seating bolts, power line stanchions, industrial plants, (including nuclear facilities, oil refineries, metal fabrication and meat processing, pharmaceutical and grain mills.

Yield: .4 to .5 cu.ft

**TWO
HOURS
TO
DRY**

ROADPATCH®

Roadpatch is a cement-base, fibered, fast-setting patching material that develops high compressive strengths and will allow traffic-bearing patches to be put back in service after 2 hours from time of placement. Roadpatch is fortified with special alkali-resistant glass fibers that improve appreciably the impact, flexural and tensile strengths. The use of these special fibers contributes substantially to the ability of the product to resist cracking and abrasion.

Uses

Roadpatch has been used by maintenance departments to patch bridge decks, curbs, expressways and other areas where partial depth patching is required.

SKU NO.	MFG. NO.	SIZE
300275	1850	50 lb

**WATERPROOF
CEMENT**

THORO® STUCCO

Thoro Stucco is a waterproof, mill-mixed, carefully formulated cement-base stucco finish. Every ingredient is carefully prepared, cleaned and properly sized, blended in proper proportion so as to provide a stucco finish that is more durable, more uniform in color and performance.

Uses

As a stucco finish over: a scratch and brown coat of portland cement/lime or portland cement/masonry cement unpainted concrete block; over clean, untreated concrete or cement plastered surfaces; smooth or dense surfaces should receive an application of Thorobond to provide adequate bonding capabilities.

SKU NO.	MFG. NO.	SIZE
300253	1980	80 LB.

**WHITE
BASE
COATING**

SUPER QUICKSEAL®

Super Quickseal is a superior, cement-base coating with a built-in bonding agent for masonry and concrete. Super Quickseal is also recommended as a finish coat over Thoroseal when a smoother finish and an all cement-base coating system is required.

Uses

Superior dampproofing decorative finish for concrete and masonry, above or below grade, inside or out. Ideal for concrete and masonry walls in basements. Use over brick, concrete, block, tile or stone. Ideal for refinishing gunite and cement-plastered walls and stucco.

SKU NO.	MFG NO.	SIZE
300178	4350	50 lb.

**ACRYLIC
POLYMRE**

**CEMENT
BASE**

THOROPATCH®

A two-component, cement-base, acrylic polymer patching compound. Thoropatch is unusually strong, durable and crack-resistant because the bonding agent is acrylic resin, the base ingredient of tough Plexiglas. The dry ingredients are a perfect blend to produce a strong, durable, dense patch. The cement-base mix and acrylic combination produces a concrete surfacing or patch material that is non-shrinking, exceptionally adhesive, crack resistant, with high structural strength.

Uses

To patch, resurface and level concrete floors, walks, steps, ramps, etc., interior or exterior.

300285	1150	10 lb
300280	1150	56 lb can

**PATCHING
CONCRETE
MASONRY**

THORITE®

Thorite is a fast-setting, non-shrink patching material with excellent structural strength specifically formulated for patching concrete and masonry. Thorite is packaged ready for use, requiring only the addition of water. It does not contain calcium chloride or waxes, tars, emulsions, metallics of any type. Thorite will not slump from the edges of the patch; its freedom from oxidation and non-shrink qualities make it a very durable patching material.

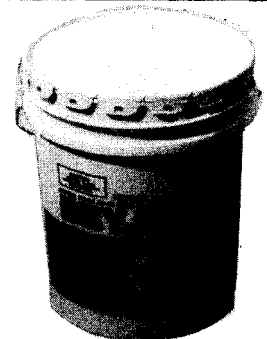

Uses

Patching honeycomb, spalls, cracks, holes left by tie wires or spreaders and construction faults in concrete; restoring concrete even where reinforcing rods are exposed; patching concrete pipe; repairing stucco; patching precast concrete.

Thoro Underlayment Primer #800 is recommended for concrete, wood, slate, tile, terrazzo & brick. No primer is necessary when applying Thoro Underlayment Trowel Grade to concrete surfaces.

SKU NO.	MFG. NO.	SIZE
300225	01312	12 LB

**WATER
PROOF**

DRYJOINT®

A waterproof cement-base, non-staining pointing mortar packaged in powder form for repointing joints in all types of masonry; brick, stone, tile, terra cotta, limestone. Dryjoint possesses non-shrink qualities, contains no metallics to rust out and discolor the wall. Dryjoint can be applied by tuck-pointing trowel or caulking gun.

Uses

For tuck-pointing of brick, stone, tile, terra cotta or other types of masonry. Contact the manufacturer where a beaded joint is required.

G-20 IRON GROUT

For anchoring

PRODUCT DESCRIPTION: A blend of portland cement, selected processed aggregates, clean, coarse and fine iron particles, and specific chemical additives. G-20 is suitable for interior or exterior use and may be used in moist and humid conditions. G-20 produces a tight surface oxidation and will not allow rusting of the inner iron particles. Due to the elongated shape of the iron particles in G-20, the product produces better vibration resistance than grouts containing round shape iron particles. G-20 is used for grouting anchor bolts, setting machinery structural members, embedding signs, posts and machinery in or on fully cured concrete.

BENEFITS: Fast setting...High Strength...Contains no added Chlorides...MIX WITH WATER ONLY.

SKU SIZE
 301578 60lb bag

SB MORTAR

INTERIOR & EXTERIOR
 Water Repellent

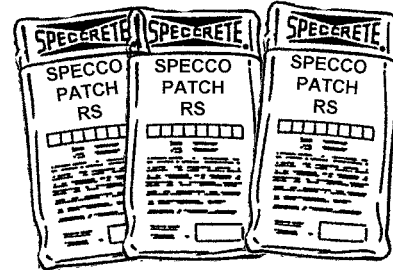

A two component concrete repair compound formulated to provide durability, crack resistance, exceptional bonding strength and water repellency. SB Mortar may be applied from feather edge up to 2 in. thick in one application. SB Mortar may be used interior or exterior, above or below grade, on vertical or horizontal concrete and masonry surfaces.

BENEFITS: Exceptional Bonding Strength...Very Durable...Water Repellent

SKU SIZE
 301585 60lb pail

SPECCRETE SPECCOPATCH-RS

PRODUCT DESCRIPTION: A specially formulated, fast setting, cement based concrete and masonry patching material that requires only the addition of water for mixing. Speccopatch RS may be used interior or exterior, above or below grade on vertical, horizontal and overhead surfaces without forms. After initial set, SPECCOPATCH RS may be shaved to the contours of the surrounding area.

SPECCOPATCH RS is used to repair concrete pipe, manholes, sidewalks, driveways, expressways, ceilings, walls, curbs and panels. SPECCOPATCH RS may be used for applications under constant moisture contact.

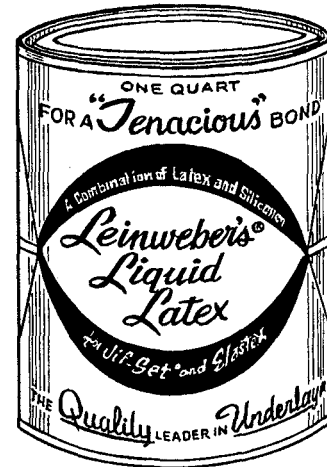

BENEFITS: Rapid Setting...Non Shrink...No Added Chlorides...Shapeable... Shaveable...Use in Thin to Thick Layers...Tenacious Bond...Resistant to freeze-Thaw...Light Color.

 301540 40lb bag

JIF-SET® is a two component, powder & latex, floor patch/underlayment used for patching and leveling interior subfloors prior to finished floor covering. May be used over any sound concrete or wood subfloor, or for repairing cracks or holes in interior. JIF-SET® is non-shrinking, seeks its own level and is self-bonding to water dampened surfaces. When mixed with LEINWEBER'S LATEX/SILICONE LIQUID, JIF-SET® is self-bonding.

SKU NO.	SIZE	COLOR
302180	10 lb.	SNOW-WHITE
302185	25 lb.	SNOW-WHITE

A high strength Latex-Silicone Liquid. Triples the bonding power of Jif-Set or any other manufacturers floor patch.

TILE REINFORCING MESH

300863	2 x 2	Sold by the foot 5' x 150' roll
--------	-------	------------------------------------

ASPHALT SATURATED FIBER TYPE

EXPANSION JOINTS

Since concrete contract and expands according to temperature changes, some type of filler is needed between slabs to keep the concrete from buckling when it expands, and to fill the resultant gaps when the concrete contracts. Expansion joints or isolation joints are used between slabs ant to separate slabs from structures, thus preventing damage during expansion and contraction cycles.

All strips are 5 feet in length and 1/2" thick.

REINFORCING MESH

Welded wire (10 gage) mesh 6" x 6" fabric provides uniform stress and distribution and more effective crack control in slab construction. Roges are 5' wide by 150' long

Wire mesh rolls have been used successfully in concrete crack control of concrete for 50 years. This product offers a convenient reinforcing material that can be cut to size for various project applications. The location of wire mesh in the slab is a very important consideration. The purpose of placing mesh in slab is a very important consideration. The purpose of placing mesh in slab on grade is to control cracking caused by shrinkage, temperature changes, and unequal subgrade support. Therefore, the proper location of the wire mesh is to place it close to the top surface, where cracking is most possible. A good rule of thumb for single layer slabs is to locate the mesh not less than 1", nor more than the top 1/3 of the slab depth from the surface.

CONCRETE FORMING TUBES

Fibre Forms are lightweight, easy-to-handle fibre tubes that can save you time and money in pouring beautiful round concrete columns.

The one-piece forms eliminate fabricating and assembly. They can be cut to length on the job site and erected, braced and stripped quickly. Since they are disposable, all forms can be poured at once.

The design of reinforced concrete structures requires engineering analysis to determine the proper thickness of the concrete section and the amount and placement of the steel reinforcement required to handle tensile and shear stresses within the section. Steel reinforcement is also required to provide positive ties between vertical and horizontal structural elements, reinforce edges around openings, and control shrinkage movement.

REBAR TIE WIRE

Georgia-Pacific rebar tie wire is manufactured to meet the specifications of most belt dispensers on the market today. It is a very soft annealed wire, assuring the utmost flexibility for fast tying, yet providing necessary strength for secure ties. **SKU NO. 300910**

CS-309™

ACRYLIC CURING AND SEALING COMPOUND

Cures and seals freshly placed concrete in one economical operation.

SEALTIGHT CS-309 Acrylic Curing and Sealing Compound is a clear, transparent, ready-to-apply non-yellowing liquid compound designed to cure and seal freshly placed concrete in one efficient operation.

Specifications
 ASTM C 309, Type 1, Class B

Acrylic Sealer (Clear)

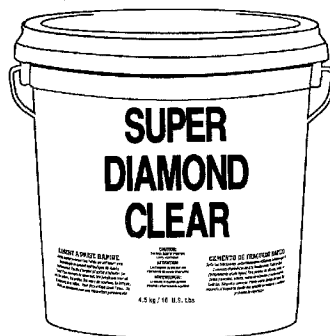

THOROGLAZE®

Thoroglaze is a clear, non-yellowing acrylic sealer for concrete and masonry. Sealer is a methyl methacrylate base. Thoroglaze finish has a clear, uniform "wet" look. The Thoroglaze film breathes.

Uses

For concrete and masonry, exposed aggregate panels, stucco and cement-based textured finishes.

TIAH® Concrete Sealer

SEALTIGHT TIAH is an acrylic copolymer solution that dries to a clear, colorless, abrasion-resistant film. TIAH will not after-yellow or change the natural color of concrete. Specially formulated to enhance the beauty of most cementitious materials. TIAH provides a highly weatherproof, stain-resistant and dustproof sealer. It can be used on driveways, patios, swimming pool areas, exposed aggregate as well as any interior or exterior surface where protection and sealing of concrete is desired. TIAH is used where a high or medium sheen is desired on the concrete.

DUR-O-WAL®

SINGLE WYTHE WALLS

Stack Bond Load
 Bearing Walls.
 8" c. to c.
 Top 3

8" Wall No. 8 Ladur Type
 16" c. to c.

PRODUCT DESCRIPTION

Dur-O-wal truss is a prefabricated reinforcement especially designed for embedment in the horizontal mortar joints of masonry. It is manufactured in 10 ft. lengths. Dur-O-wal truss consists of two or more parallel, longitudinal rods weld-connected to a continuous, diagonally oriented cross rod, thus forming a truss design. The continuous, diagonally oriented cross rod is electrically butt-welded to deformed side rods, in a single plane. Out-to-out spacing of side rods is approximately two inches less than the nominal thickness of the wall or wythe in which the reinforcement is placed.

NO. 600 DETERGENT

A concentrated blend of surface acting acids, chelating and wetting agents formulated as a high efficiency, general purpose cleaner for new masonry surfaces. No. 600 Detergent removes mortar/grout stains, efflorescence and other new construction stains from masonry and concrete surfaces which are not subject to metallic oxidation. Will not discolor or damage the surface—safer and more efficient than muriatic acid.

MORTAR COLORS DESCRIPTION

Basic Use: Mortar Colors are pure mineral pigments designed to be used with all cementitious material whether it may be a Type N, S, M or O strength masonry cement or portland and lime mixtures. The premeasured unit concept of colors provides uniform color control with the flexibility of utilizing local masonry and/or portland and lime cements to achieve the proper strength and mix design for brick, block, stucco or stone unit construction.

GLASS BLOCKS

Energy Conservation

When the two halves of a glass block are fused together, a partial vacuum is created within the block. This vacuum gives glass block the insulating value of a 12-inch thick concrete wall.

Security Advantages

Glass blocks are exceptionally rugged. The transparency and light transmission characteristics provide security without creating a "closed-in" feeling.

FIRE BARRIER SYSTEMS

metacaulk 1000 INTUMESCENT FIRESTOP SEALANT

Metacaulk® 1000 is a water based, flexible, highly intumescent sealant designed for use on metal, insulated, fiberglass and plastic pipes. It can also be used for top of the wall construction joints, power and telephone cables.

- ◆ UL Classified up to 3 hours
- ◆ Meets ASTM E 814, UL 1479 and UL 2079 Standards
- ◆ Remains flexible
- ◆ Non-sagging, non-toxic, no VOC's
- ◆ Economical
- ◆ Will not re-emulsify after cure
- ◆ Paintable
- ◆ Available in cartridges and pails

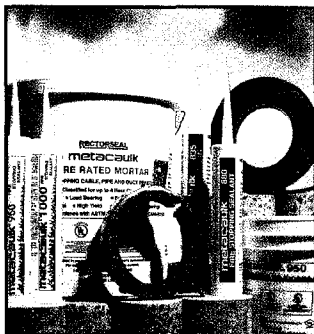

SKU	Size
458500	10.3 oz tube
458506	30 oz tube
458505	5 gal. pail

Metacaulk® 1000 has passed UL 2079 for top of the wall applications with fiberglass backing and as little as 1/4 inch depth of caulk. The test assembly was also subjected to 500 cycles on a specially built machine that successfully demonstrated the product's durability and movement characteristics.

FIRE RATED MORTAR

**3M CP-25WB+
FIRE BARRIER CAULK**

Premium, intumescent latex/water-based caulk. Provides easy clean-up and routine disposal with no special handling. One-part system with no mixing or measuring require Intumescent and endothermic. Dries fast and tack-free in approximately 10-15 minutes.

SKU NO.	MFG NO.	SIZE
457108	07580-3	10.5oz

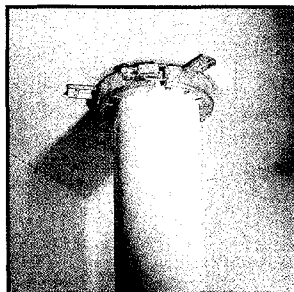

Metacaulk® Putty Sticks are used to seal around penetrating items through fire rated walls, floors and within blank openings. For use with electrical cables, conduit and metal pipes. Hand moldable with no curing time required. Will not dry out and can be re-used as additional penetrating items are removed or installed.

Metacaulk® Putty Pads are used to maintain the hourly rating of fire rated walls containing electrical outlet boxes and to reduce sound transmission. Only one pad thickness (1/8 inch) is required for a 1 or 2 hour fire rating. No additional putty material needed to plug the end of each electrical metallic tube or conduit at its connection to the box.

SKU	Size
458509	18 cu.in. Putty Stick
458512	6"x7"x1/8" Putty Pac

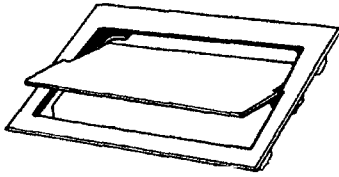

Metacaulk® Pipe Collars are prefabricated for through-penetration firestop systems using PVC, CPVC, ABS, PVC foam core and ABS foam core pipe. UL Classified for both open and closed pipe systems.

- ◆ 25% reduction of installation time
- ◆ Simple lock-in mechanism for easy installation
- ◆ Economical - no backfill required
- ◆ No measurement of material required
- ◆ Fits in limited access areas
